

REMARKS

Claims 74-102 are pending in the application, with claims 74, 75 and 90 being independent. In the Office Action, the claims were subjected to a restriction requirement. Applicant elects Invention I, with traverse.

Invention I, claims 74-89 and 101 drawn to network resources access controlling, classified in class 709, subclass 229.

Invention II, claims 90-100 & 102, drawn to object protection, classified in class 713, class 167.

Applicant submits that this restriction is unwarranted since all the claims have been previously searched and examined, with no further search necessary. Furthermore, per the Examiner Interview of October 24, 2006, the Examiner has already concurred that all claims have already been examined. Therefore, since these inventions are directed to similar subject matter and have already been searched and present no additional burden on the Examiner, Applicant submits that the restriction requirement should now be withdrawn and all claims allowed.

Conclusion

In view of the foregoing, Applicant submits that all of the pending claims are in clear condition for immediate allowance. Applicant respectfully requests that the application be passed promptly to issue. The Examiner is invited to contact the undersigned at the telephone number listed below, if needed. Applicants hereby make a written conditional petition for extension of time, if required. Please charge any deficiencies in fees and credit any overpayment of fees to Attorney's Deposit Account No. 23-1951.

Respectfully submitted,

Charles J. Gross
